

# workload 0.1

**Plugin Name:** Workload

**Plugin ID:**

**Warning:** This plugin hasn't been tested in other systems before publishing. DNOISE Communication Agency Limited is not responsible for any problems derived from the program set-up. The user is responsible for any potential issues and/or data loss.

**Description:**

This plugin uses graphics to represent total workloads and also the workload involved in the following tasks:

- Average time assigned to issues. The plugin shows the amount of hours per issues within a project as well as the total of hours assigned to that project. Different colours are assigned to each issue.
- This application also represents the % of hours used against the % of hours estimated for a issue. It also indicates the amount of extra time used over the initial estimate. In addition to this, the plugin also advise if a project doesn't have assigned and also beginning and end dates.
- This plug-in determines the timing of an application, showing different status: on time, delayed, etc
- This plugin is especially helpful in organisations with a high workload and/or a organisations with scarce human resources.

**Known issues**

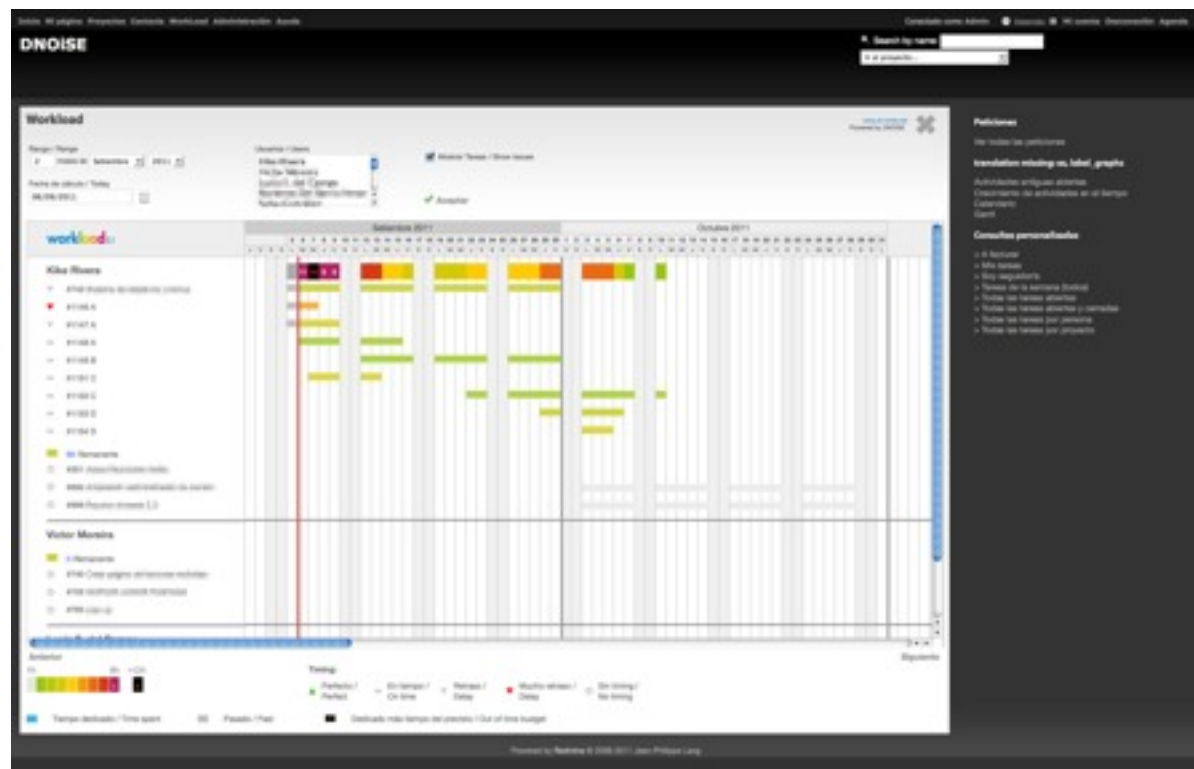

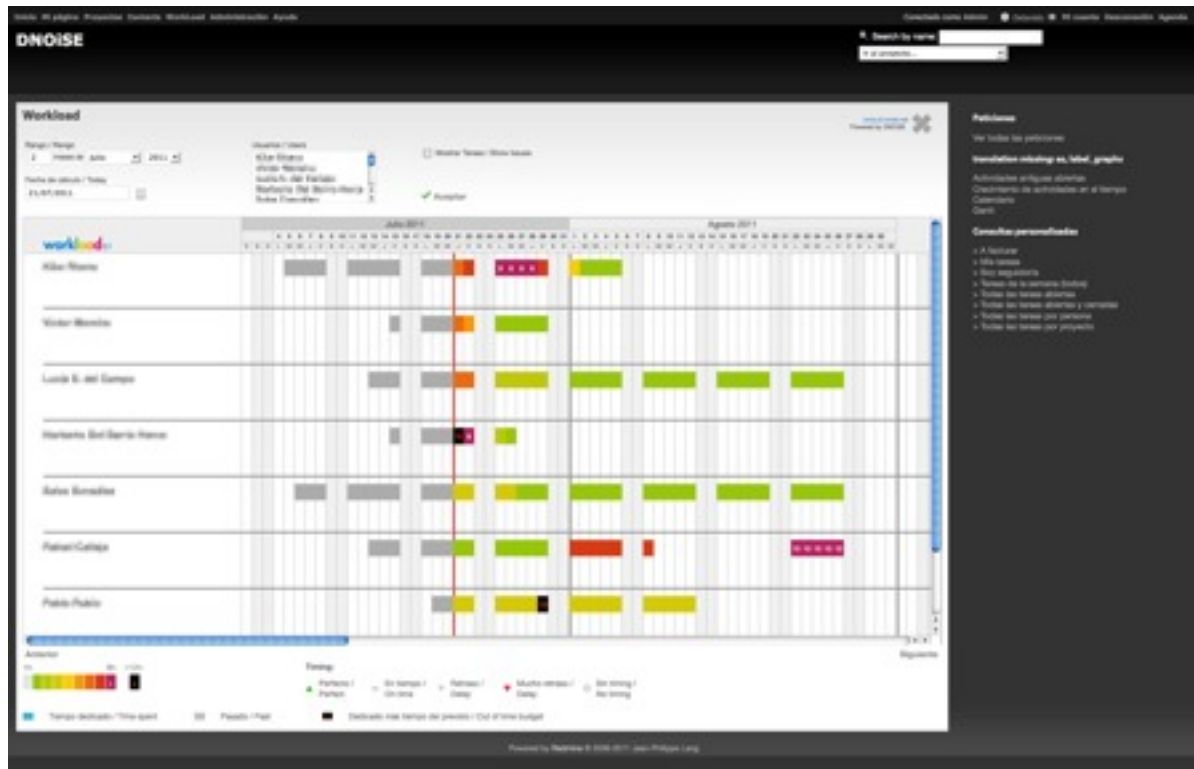

- It doesn't differentiate between public of private projects
- All users have access to other's users workload issues
- Some design problems.

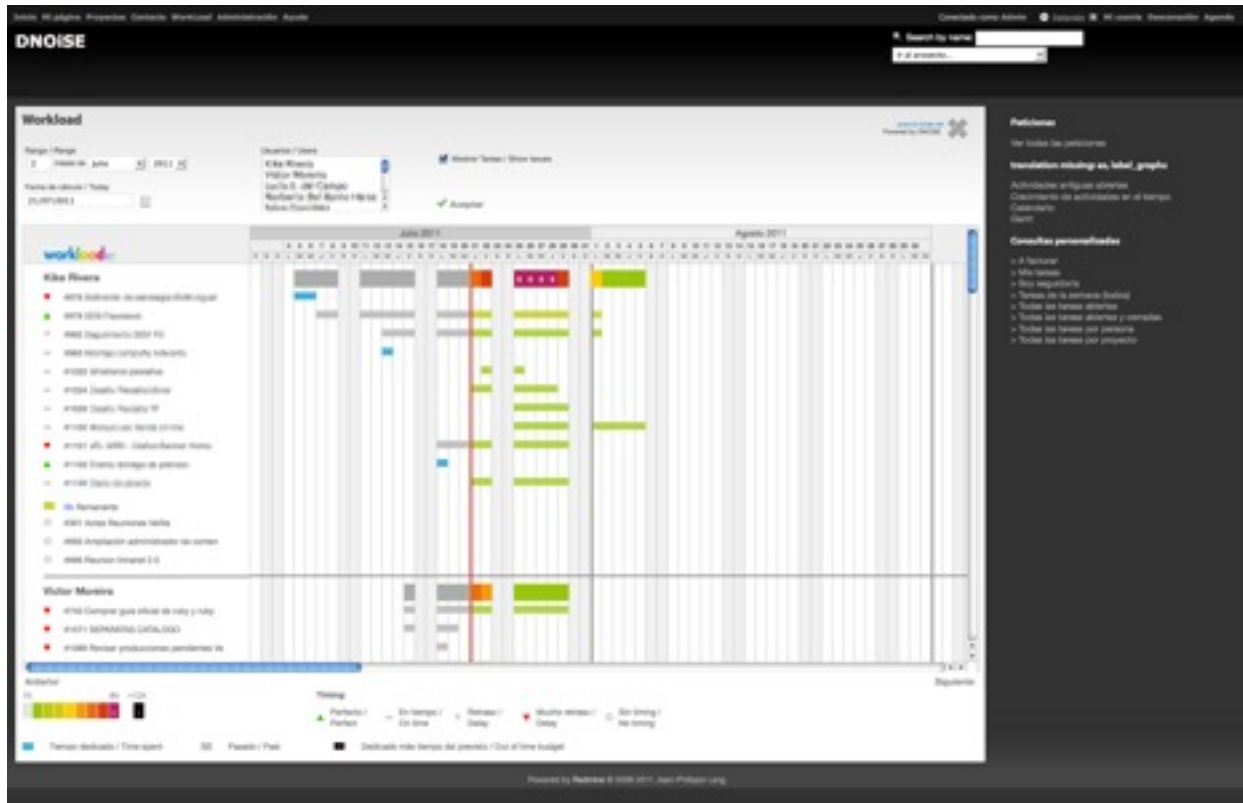

**TODO**

- Implementing zoom
- Exporting to PDF
- Customising colours
- Running reports
- Adding holidays
- Showing % of completed issues in the diagram
- Showing issues per project
- Filters to show more issues, similar to Gantt calendar
